

No. of Functional Features Included in the Solution

Date	29 September 2026
Team ID	SWTID-2026-1374
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Creation	Creates the test user "EEE User" (First Name: EEE, Last Name: User, Email: eeeuser@gmail.com) to verify access control behaviour.	User Administration → Users	Done	0.5
2	Role Creation	Creates four custom roles (bb1, bb2, bb3, bb4), one for each record operation: Read, Create, Write and Delete.	User Administration → Roles	Done	0.5
3	Role Assignment	Assigns the required roles to the EEE User so that the ACL rules can be tested for that user.	User Administration → Users	Done	0.5
4	Custom Table Creation	Creates the table "Institution Details" (u_institution_details, extends table: False) with the required student fields.	System Definition → Tables	Done	0.5
5	Sample Record Creation	Adds multiple records with different Branch values (EEE, ECE, CSE) to test field-value based restriction.	Institution Details table	Done	0.5
6	Script-Controlled READ ACL	Advanced Read ACL requiring role bb1 with data condition "Branch is EEE". Script allows admin and bb1 users and denies everyone else.	System Security → Access Control (ACL)	Done	1.0
7	CREATE ACL	Record-level Create ACL on u_institution_details; only users with role bb2 can create records. No data condition.	System Security → Access Control (ACL)	Done	0.5

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
8	WRITE ACL	Record-level Write ACL on u_institution_details; only users with role bb3 can update records. No data condition.	System Security → Access Control (ACL)	Done	0.5
9	DELETE ACL	Record-level Delete ACL on u_institution_details; only users with role bb4 can delete records. No data condition.	System Security → Access Control (ACL)	Done	0.5

Feature Summary:

Metric	Count / Value
Total Features Planned	9
Total Features Implemented	9
Core / Must-Have Features	8
Additional / Nice-to-Have Features	1 (Sample record creation)
Features Tested & Verified	9

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	User Creation, Role Creation (configured through ServiceNow forms)
2	Backend / Logic	1	Script-Controlled READ ACL (server-side script using gs.hasRole)
3	Database / Storage	2	Custom Table Creation (u_institution_details), Sample Record Creation
4	API / Integration	0	Not applicable – uses only native ServiceNow platform features
5	Security / Authentication	4	Role Assignment, CREATE ACL, WRITE ACL, DELETE ACL
